HONEY

Controlled Swiss Honey

from Kleinlützel and surrounding area

Price per kilo CHF 22.00

Throughout the year we offer you the possibility to purchase an excellent Swiss honey from the local area.

Mr. Georg Allemann, Mühlerain 150, 4245 Kleinlützel has been a passionate beekeeper for over 20 years. He looks after his honey bees in more than 300 beehives at Kleinlützel and its surrounding area. The produce from each hive is some kilos of honey every year, whereas the exact quantity strongly depends on the weather conditions.

Mr. Allemann's Bees mainly fly in the pine forests in the area but they also collect nectar from a multitude of blossoms in trees, meadows, hedges and flowers in the village gardens. Bees are most important for pollination of trees and plants.

Thanks to its numerous ingredients, such as vitamins, minerals, pollen, fragrances, etc., honey is a unique and pure natural product. It is easy to digest and is an excellent source of energy. For thousands of years honey has been used as a natural source of energy and for a long time it has been the only natural sweetener. Honey can be stored for many Years, preferably in a dry, cool and dark place.

The honey is available from the NAV office. Please observe our opening times mentioned above.

Kind regards
